Product Description Summit aluminium strut bar front (Civic 2015+)

Description

Summit Racing was founded in 1998 by former GP/GT driver mr. T. Hsieh, developing mainly racing parts for local racers and high-end tuners and performance specialists. Rapidly becoming a force into suspension technology in Asian/Eurasian territory, being used in many serious performance cars as well as race GT saloons. The Summit brand quickly gained recognition and awareness throughout the rest of the world at tuners and racers, being a manufacturer and having their own R&D center means that parts developed and thoroughly tested in house. Summit is making use of the highest grade materials only, welded and constructed by cutting edge automated machinery you can rest assured that you get the best there is to offer in suspension technology.

Continuously developing new products for new applications and product extensions throughout, also on the look-out for new technology & the finest in materials to increase overall product quality and innovate on the existing ranges , Most recent new development at Summit Racing is the " SWAVE" productrange which is purely dedicated to steering/suspension related products, another step in providing a complete solution for suspension fine-tuning making race inspired quality products affordable for your high performance vehicle.

This aluminium Summit strut bar for the front of the car has been specially designed for the Civic 2015+ Turbo and NON Turbo.
